2

National Resource Center on Native American Aging (NRCNAA)

Twenty-eight years
serving Tribes, Alaska
Native villages, and
Native Hawaiian
homesteads.

Located at the University
of North Dakota, School
of Medicine & Health
Sciences, Center for Rural
Health.

Funded by the
Administration for
Community Living
(ACL).

Two sister centers in
Alaska and Hawaii.

3

Mission: identify and
increase awareness of
evolving Native elder health
and social issues.

Vision: is to empower Native
people to develop
community- based solutions
while honoring and helping
to maintain cultural values.

4

Why is Data Important?

Decisions are based on data

- Populations with little or no data are easily overlooked (Urban Indian Health Commission, 2007)

Provides an accurate picture of the Native elder population

- Collecting custom fit data

Assists in setting goals and priorities

Identifies specific areas of health and social needs

- Resource allocation

Relevant actionable data

- Assists in securing grant funding opportunities.
- Assists policymakers, tribal leadership, directorship, and management to make decisions based on facts and numbers.

5

Data Challenges

- Data not being readily available to tribes.
- Significant gaps in data.
- National data sets are skewed due to misclassification of race/ethnicity.
- Small sample size
- Unreliable

(Urban Indian Health Commission, 2007)

6

Why are needs assessment important?

Identify
problems/needs

Health priorities

Prevalence of
health and
social disparities

Picture of
current state of
health and
social issues

Allows us to
identify
resources in
place to build
from and
improve

- ▶ Identify the priorities needs
- ▶ Set goals and objectives to address the needs
- ▶ Support applications for funding and resources to support the service or intervention to address the needs

7

NEEDS ASSESSMENT PURPOSE

- ▶ IDENTIFY PROBLEM OR NEED
- ▶ HEALTH NEED PRIORITIES
 - ▶ WHAT ARE THOSE PRIORITIES?
 - ▶ EX. CHRONIC CONDITIONS, FALLS PREVALENCE, OTHER HEALTH ISSUES
- ▶ PICTURE OF CURRENT HEALTH OF ELDERS IN COMMUNITY
- ▶ IDENTIFY CURRENT RESOURCES
 - ▶ PARTNERSHIPS
 - ▶ EX. IHS, TRIBAL HEALTH, OTHER RESOURCES IN THE COMMUNITY

8

Identifying our Needs: A Survey of Elders

9

Needs Assessment Data

- General health status of Native elders
- Indicators of chronic health
- Activities of Daily Living
- Screenings
- Indicators of visual, hearing, and dental
- Memory and Disability
- Health Care Access
- Tobacco and alcohol use patterns
- Diet, nutrition, and exercise
- Social support pattern and housing
- Social Functioning
- Use and acceptance of services
- Demographics

Comparison Sheet Data

Tribal Aggregate Cycle VI (N=18,134) Comparison Data to Aggregate Tribal Data and National Data

Question	Response(s)	Tribal Data (55 and over)	Aggregate Tribal Data (55 and over)	National Data ¹ (55 and over)
General Health Status				
1. Would you say your health in general is excellent, very good, good, fair, or poor?	Excellent	2.5%	6.0%	13.8% ¹
	Very Good	12.2%	19.9%	29.2% ¹
	Good	35.3%	39.7%	32% ¹
	Fair	35.3%	26.8%	16.8% ¹
	Poor	15.7%	7.6%	7.8% ¹
2. During the past 12 months, how many different times did you stay in the hospital overnight or longer?	None	60.5%	74.6%	81.5% ³
	1 time	15.5%	8.9%	11.8% ³
	2 times	10.0%	5.9%	3.9% ³
	3 or more times	14.0%	10.5%	2.7% ³

16

Using Needs Assessment Data

Social and Housing Characteristics

One third (Replace with percent from item 49 on comparison sheet.) of the elders in our community live alone. This means that 1/3 of our elders would be at risk for requiring help from outside the household – formal services or informal care from relatives who do not live with them. This proportion is large and suggests a strong need for building home and community based services that can support both the elder and his or her informal care provider.

17

Using Needs Assessment Data

Our Tribe's Elder Needs Assessment Findings

The following can be used for question 1 in the Management Assessment section of the Title VI application.

The elders of our tribe are highly valued as members of their families and their communities. We must recognize them, hold them in high esteem and look to their experience and wisdom for guidance. We must seek optimal wellness for them and seek to help them retain the highest quality of life possible through independence in living.

Leading chronic diseases:

The top chronic diseases found among our elders were high blood pressure, arthritis, diabetes, depression and osteoporosis. (Replace the disease names and percentages with the top five from item 3 in the comparison sheet.) Each of these lead to limitations on peoples' ability to take care of themselves and each are diseases for which treatments that make a difference are available. Nutritional care is particularly important for high blood pressure, diabetes and osteoporosis.

Five most common chronic diseases in our tribe for persons 55 and over	
High blood pressure	52.9%
Arthritis	45.9%
Diabetes	36.1%
Depression	17.1%
Osteoporosis	8.4%

Disparities between our tribe and the nation provide us information on specific diseases where our people appear to be at greater risk than others in the nation. This information assists in identifying diseases where others have had greater success with health promotion efforts and where we should be able to make significant improvements in health status for our elders. The following table presents these diseases. (Again, examine item 3 in the comparison sheet and use those diseases where the percent for your tribe is higher than the national comparison.)

18

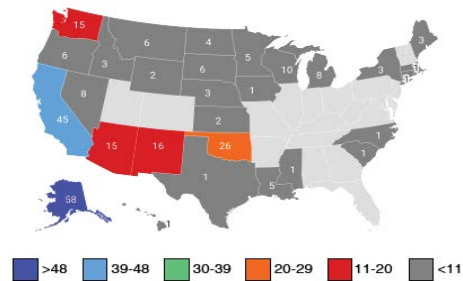

Identifying our Needs: A Survey of Elders

Participation in Cycles I - VII

Participation in the Title VI Needs Assessment has grown steadily each cycle. Cycle VII saw the largest number of participants to date with 23,427 surveys collected across tribes in the U.S.

Number of Indigenous Communities Participating in Cycle VII

19

20

Alzheimer's Disease Among Native Elders in the U.S.

Identifying Our Needs: A Survey of Elders

Out of a sample of 16,683 Elders over the age of 55 in the US:

4.3%

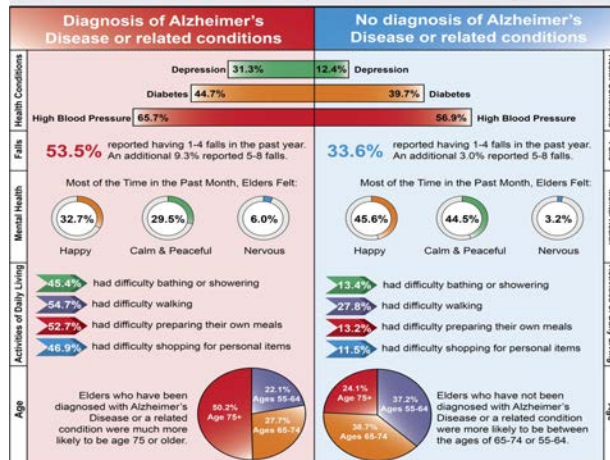

reported being diagnosed with Alzheimer's Disease, dementia, or other problems with memory or thinking (n = 689)

6.3%

reported that someone they are helping care for has been diagnosed with Alzheimer's Disease, dementia, or other problems with memory or thinking (n = 993)

1.1%

reported that they have Alzheimer's and someone they are helping care for has been diagnosed with Alzheimer's Disease, dementia, or other problems with memory or thinking (n = 176)

Utilization of Data for Tribes

- **Local Tribal/State/National Level**
 - Assist in program planning, grant writing, and advocacy
 - Tribal planning (budget, infrastructure)
 - Renewal of Title VI grants
 - Strengthen grant proposals
 - Advocating for resources at the state and national levels
 - Document health and social disparities
 - Identify strength-based programs and interventions
 - Empowers the tribes with information to identify and address health needs
 - Training for Native elder service providers
 - Filling the research gap for Native elder information
 - Training Native researchers in aging field
 - Decision-making and policy

45

IDENTIFIED PRIORITY HEALTH NEED

- ▶ DEVELOP PLAN TO IMPROVE THE PROBLEM OR ADDRESS THE NEED
- ▶ WE NEED RESOURCES OR FUNDING TO HELP SUPPORT THE SERVICES OR PROGRAM TO ADDRESS THE NEED
- ▶ WE NEED DATA...
 - ▶ TITLE VI ELDER NEEDS ASSESSMENT

46

Examples Title VI Elder Needs Data

What is the problem/need?	What are the causes?	Plan and test what works.	How do you do it?
<ul style="list-style-type: none"> Title VI Elder Needs Assessment identified a need to increase physical activity and lower obesity among their Tribal Elders. 	<ul style="list-style-type: none"> Risk factors Low physical activity. High prevalence of obesity Sub-risk factors Lack of access to healthy foods, traditional foods No transportation to participate in exercise programs. Environmental risk factors Safety No sidewalks, dogs, etc. No physical activity programs for elders. 	<ul style="list-style-type: none"> Developed a plan and worked with Title VI staff member, who researched and brought in a new yoga program for the elders to combat obesity and increase physical activity. 	<ul style="list-style-type: none"> Implemented the program for the elders in their community. The program is well attended, word spread of the program.

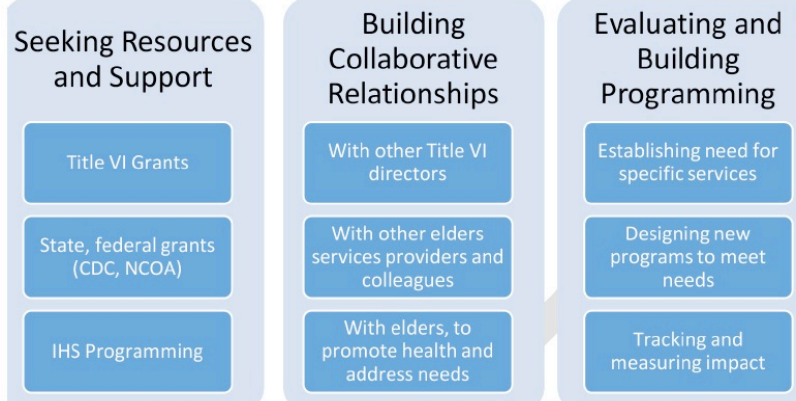

47

Examples Title VI Elder Needs Data

What is the problem/need?	What are the causes?	Plan and test what works.	How do you do it?
<ul style="list-style-type: none"> Title VI Elder Needs Assessment identified a need to educate elders on the dangers of diabetic neuropathy and on appropriate foot care for diabetics. 	<ul style="list-style-type: none"> Risk factors High prevalence of diabetes. 	<ul style="list-style-type: none"> Developed a plan and approached IHS with the data and created a partnership to address the need. 	<ul style="list-style-type: none"> IHS conducted a training specific to diabetic foot care.

48

Examples of Using the ION Needs Assessment Data

49

WELL-Balanced

Exercise program for Native Elders promoting:

- Falls prevention
- Strengthening and balance
- Engaging in social activity
- Managing diabetes, arthritis, and high blood pressure
- Developing strategies for independent living while having FUN!

50

NATIVE ELDER CAREGIVER CURRICULUM 2ND EDITION

Caring for
Our Elders

A training resource
for families and
caregivers serving
rural American Indian
Elders

Reprinted Resource Center on Native American Aging,
Center for Rural Health, University of North Dakota

- Many elders prefer to “age in place” (home and community).
- Tool to assist Native Elder caregivers including Community Health Representatives (CHRs)
- NECC guided by awareness of the modern context of Tribal reservation communities with a mindfulness of rich tradition and strengths of American Indian nations.

Native Service Locator

Turtle Mountain Band of Chippewa Indians
Nutrition & Supportive Services
Address: 1001 Louis Riel Drive
Belcourt, ND 58316
Phone: 701-477-6609
Director: Alfreda Morin
Email: alfredamorin42@gmail.com
Hours: 8:00 am - 4:30 pm Central

Services

The following services are offered by the Nutrition & Supportive Services at the Turtle Mountain Band of Chippewa Indians:

- Caregiver Programs
- Congregate Meals
- Elder Abuse Prevention Programs
- Emergency Response Systems
- Employment Services
- Financial Assistance
- Government Assisted Housing
- Home Delivered Meals
- Home Health Services
- Home Modification
- Information and Referral/Assistance
- Legal Assistance
- Respite Care
- Retirement Communities
- Senior Center Programs
- Telephone Reassurance
- Transportation
- Volunteer Services

WHAT WE CAN DO FOR YOU

Title VI Needs Assessment: "Identifying Our Needs: A Survey of Elders"

The purpose of this survey is to assist tribes, villages, and homesteads in creating a record of the health and social needs of their elders.

Urban Needs Assessment: "Native Urban Elder Needs Assessment Survey"

The purpose of this survey is to assist tribes, villages, and homesteads in creating a record of the health and social needs of their elders.

Native Elder Caregiver Curriculum

Elder caregivers in your community are one of our most valuable resources. Help them function more effectively with a three-day workshop.

Native Service Locator

An interactive map with Tribal Elderly services available in the continental U.S., Alaska, and Hawaii.

Native Aging in Place Project

This project works to create a sustainable infrastructure of long-term services and supports for Spirit Lake Tribal Elders by creating and implementing best practices that allow Native American Elders to live independently in their homes.

Well-Balanced Program (Wise Elders Living Longer)

A group program designed specifically for Native American Elders, combining exercise, information, and social interaction to help Elders remain active and independent as long as possible.
